About

Dependable and professional developer with a knack for solving the most difficult of problems.

WORK EXPERIENCE

Project Admission

Senior Software Engineer - Full Stack
2022-2023

Developed a fully fledged Web2/Web3 hybrid application allowing users and content creators alike to buy, sell, redeem, and transfer digital collectible assets (NFTs).

Spearheaded all aspects of the payment flow which included Stripe integrations and both front-end and back-end business logic.

KELLYBRADY Advertising

Lead Web Developer
2015-2022

Built and worked on over 50 projects including CMS websites, custom 3rd party API integrations, in-house reporting and tooling, eCommerce stores, and custom built web applications to client specifications.

Responsible for interfacing directly with clients, providing estimates for projects, developing the DevOps procedures and grew the non-existent development department to a profitable side of the business.
